INFORMATION FOR CONTRIBUTORS

1. The journal will publish papers written in English, which contain the results of original research, on the following topics: theoretical biochemistry, animal biochemistry, plant biochemistry, fungal biochemistry, bacterial biochemistry, clinical biochemistry and applied biochemistry. The journal will also contain occasional Review Articles and Short Communications which the author does not intend to publish in greater detail at a later date.

2. Papers should be submitted to the Editor: Professor G. A. KERKUT, Department of Physiology and Biochemistry. University of Southampton, Southampton SO9 3TU, England. Submission of a paper to the Editor implies that it has not previously been published, that is not under consideration for publication elsewhere, and that, if accepted for publication, it will not be published elsewhere in the same form without the written permission of the Editor. Articles and illustrations become the property of the journal.

3. Manuscripts and illustrations should be submitted in duplicate, and the author should retain at least 1 copy. In the case of multiple authorship, the authors should indicate to whom the proofs are to be sent.

4. Manuscripts should be typewritten, with double spacing and wide margins. Authors are requested to keep their communications as concise as possible, **and in order to conserve space, the author should indicate which sections of the paper may be printed in small type.** Footnotes should be avoided and italic should not be used for emphasis. A running head of not more than 30 letters should be supplied.

5. In general, the typescript should follow the conventional form: title, author's name and full address, abstract, introduction, materials and methods, results, discussion, conclusion, summary, references, tables, legends to figures and figures.

6. *The Abstract*. This should be very short, between 50 and 100 words, and should contain numerical and factual data only. Together with the title it should serve to make the precise significance of the paper clear to the non-specialist reader.

7. *The Summary*. This may be longer than the abstract and should provide details for specialists.

8. *Illustrations*. All necessary illustrations should accompany the manuscript, but should not be inserted in the text. All photographs, graphs and diagrams should be numbered consecutively in arabic numbers in the order in which they are referred to in the text.

Glossy photographs or positive prints (not X-ray negatives or slides) should be sent, unmounted, wherever possible, and should be restricted to the minimum necessary.

Charts, graphs, or diagrams should be drawn boldly in black ink on good-quality white paper or card. Lettering to appear on the illustration should be given in full and should be of sufficient size to withstand considerable reduction where necessary. Alternatively, lettering may be shown on a rough overlay and will be inserted by the publisher.

Illustrations should not be larger than 9.5 × 12 in. or they may be damaged in the post. On the back of each illustration should be indicated the author's name, the figure number, and the top of the illustration, where this is not clear.

The following symbols should be used on line drawings as they are readily available to the printer:

○ ● + × □ ■ △ ▲ ▽ ▼

Legends to figures should be typed on a separate sheet and not on the back of the original, and should give sufficient data to make the illustration comprehensible without reference to the text.

9. In the interest of economy, and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the author's typed manuscript, and the following points should therefore be observed during their preparation:

(*a*) **Tables should be prepared for direct camera copy.** Refer to current tables in the journal, and arrange the spatial layout of the table to conform.

(*b*) Type should be clear and even.

(*c*) Tables, headings and legends should be typed on a separate sheet. Indicate on a Xerox copy of the table, where the headings and the legends should go.

(*d*) Insert heavy rules at the head and foot of each table, and fine rules below column headings.

(*e*) Leave the *minimum* space required to avoid confusion between columns.

(*f*) Genus and species names and other words normally italicized should be typed in italic or underlined.

For guidance on how best to prepare the tables for photographic reproduction, and in case of difficulty, please contact the Photoreprographic Section of your institution for assistance.

10. *References*. The Harvard system is followed. References should be detailed in the following order: authors' names and initials, date of publication (in parentheses), the title of the article, the name of the journal as abbreviated in the *World List of Scientific Periodicals* (4th edn, 1963), the volume, and the first and last pages of the article. For example:

Ragan C. I. (1976) The reconstitution of mitochondrial energy conserving systems. *Int. J. Biochem.* **7**, 1–60.

For books, the author's name, date of publication, title, edition, page reference, publisher and location should be given. For example:

Broder E. and Mark A. (1975) *Bioenergetic Processes*, 2nd edn, Vol. 1, pp. 62–77. Pergamon Press, Oxford.

In the text, references should be given as: Smith (1964) or (Smith, 1964). In the case of multiple authorship, *et al.* should be used throughout; i.e. Smith *et al.* (1964). If works published by the same author(s) in the same year are cited, they should be distinguished by the letters a, b, c etc.

11. Only standard abbreviations should be used. Where specialized abbreviations are used the name should be given in full in the first instance with the abbreviation indicated in parentheses.

12. Latin names should be given for all species used in the investigation.

13. Corrections should be restricted to printer's errors only. Other than these, substantial alterations will be charged to the author.

14. Reprints will be supplied if authors indicate their requirements on the form which will accompany the proofs. Copies of the issue (at a specially reduced rate) may also be ordered on this form.

15. The original manuscript and diagrams will be discarded one month after publication unless the publisher is requested to return original material to the author.

PHARMACOLOGY BIOCHEMISTRY AND BEHAVIOR

Editor-in-Chief: **Matthew J. Wayner**
Division of Life Sciences,
The University of Texas at San Antonio, San Antonio, TX 78285

Assisted by 37 distinguished Regional Editors

PHARMACOLOGY BIOCHEMISTRY AND BEHAVIOR publishes original reports of systematic studies in the areas of pharmacology, biochemistry, toxicology and behavior, in which the primary emphasis and theoretical context are behavioral.

Since its inception in 1973, **PHARMACOLOGY BIOCHEMISTRY AND BEHAVIOR** has been known as the premier journal in its field. Many early studies in behavioral pharmacology and behavioral toxicology on alcohol, marijuana, cocaine, benzodiazepines and many other beneficial and abused substances were reported for the first time in this journal.

Published bimonthly, the journal features:
- original research reports
- brief communications describing a new method, technique or apparatus
- rapid communications
- meeting reports
- relevant review articles

Subscribe today to this highly acclaimed and informative journal.
There will be no better time.

Back Issues of Pergamon International Research Journals

Back issues of this and other essential Pergamon journals are available in hard copy or microform. New subscribers to a journal may purchase back issues of that publication in hard copy and microform editions at 25% discount, on the standard price. Stocks of back issues are maintained at all of Pergamon's numerous worldwide offices, and orders may be placed with confidence at the location most convenient to you. Should any issue of a volume be temporarily out of stock at the time of ordering, a photoduplicated copy will be supplied at no extra charge to complete your order.

Save up to 33% by Purchasing Complete Sets

Customers wishing to purchase complete sets can do so at a saving of 25% to 33% less than the individual volume price.

Hard Copies

Complete sets of back volumes of journals are available in hard copy and microform at discounts ranging from 25% to 33%.

The Microform Alternative

A very competitive price alternative to the hard copy is microform which represents a substantial saving of a further 50% on microfilm and 20% on microfiche

Microform at 50%: Special Trade-in Price for Back Issues

A hard copy back issue volume of any Pergamon Press journal, or the immediately preceding volume in hard copy, may be traded-in against the same volume or volumes in microform. The trade-in allowance is 50% off the listed price of the microfilm or microfiche, and applies to both separate reels and complete back issue sets.

Back Issues Price List

Full details of the rates for back issues of all Pergamon journals can be found in our Back Issues Price List. Please contact your nearest Pergamon office for a copy.
